

Mida sa teed kevadel?

What do you do in the spring?

Martin: Kevaditi saab rohkem käia jalutamas. Kevaditi läheb varem valgeks ja hiljem pimedaks, nii et saab rohkem tööd teha, mis on ka väga tore! Kõigile väga meeldib töö! Aprilli teises pooles, mai alguses algab ju ka grillihooaeg, nii et saab hakata väljas liha grillima. Kutsun sõbrad endale külla või lähen sõpradele külla, võtan kaasa liha, grillime seda, ajame juttu. Linnud, muuseas, hakkavad ka laulma. Lindude laulu kuulamine on ka väga tore asu, millega kevadet sisustada. Praegu nad juba laulavad.

In spring one can go for walks more. In spring it gets lighter earlier and darker later, so one can work more, which is also very nice! Everybody likes work a lot! In the second half of April or in the beginning of May the grilling season starts, so one can start grilling meat outdoors. I invite friends over or go visit my friends, I take meat along, we grill it, and chat. Birds, by the way, start singing, too. Listening to birdsongs is also a very nice thing with which to occupy one's spring. They are already singing now.

Anastassia: Kevadel käin jooksmas ja siis käin kodus aias ringi, võib-olla kõpitsen muru natukene ja vaatan, kuidas kevadlilledel läheb. Ja olen niisama. Pesen grilli puhtaks ja valmistun grillihooajaks.

I go jogging in spring and then I go round in my home garden, and maybe I fuss with the grass a bit and look at how the spring flowers are doing. And I just am. I wash the grill clean and get ready for the grilling season.

Maria Liis: Kevadel istutame lilli. Kui lumi ära sulab, siis kõigepealt vaatame, mis lilled on alles. Siis kaevame aiamaa üles, paneme seemned kasvama. Ja siis istutame taimed maha.

We plant flowers in spring. When the snow melts, the first thing we do is to check which flowers are still alive. Then we dig up the garden beds and plant seeds. And then we put the plants in the ground.
